UK SURFACE ENGINEERING INDUSTRY – PRESENT & FUTURE

A FREE ONE DAY CONFERENCE – [CLICK HERE TO REGISTER](#)

TUESDAY 17 FEBRUARY 2015

Following their successful seminar at MACH 2014, Cranfield University and the MTA have once again teamed up to bring Members a special conference on UK Industrial Surface Engineering.

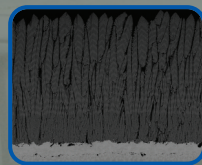

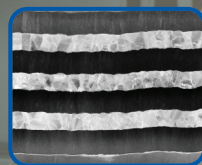

This free full day conference will be held on 17 February 2015 at Cranfield University, Bedfordshire.

Surface engineering has been recognized as an enabling technology which is capable of addressing some of the key issues faced by the manufacturing industry. The development, application and validation of surface engineering treatments are valuable tools in achieving differentiated products by allowing, at the same time, high materials performance and advanced designs.

There will be 12 talks by leading industry experts and the chance at the end for discussion. Registration will open at 9:30 with coffee, starting at 10.00 and the day will conclude at 17:00. There will also be the opportunity to tour the Cranfield University Laboratory.

As with similar MTA conferences, such as that held at the AMRC earlier this year, there will be the opportunity for MTA members to exhibit at the event. Further details can be obtained from Deborah Darnell via ddarnell@mta.org.uk

Further details, including full itinerary are available via pdf – [DOWNLOAD HERE](#)
